

Dr Henriette Cornet, Principal Investigator ‘Design for Autonomous Mobility’

Henriette Cornet graduated from the Technical University of Troyes, France, as a Material Engineer in 2007. She worked at Technische Universität München as a Research Associate from 2008 to 2011 and received her doctoral degree in 2012. The topic of her PhD thesis was the development of a sustainability screening tool for decision-making assistance in the field of urban mobility. From 2011 to 2016, she worked as consultant for the automotive industry in Germany (BMW, Audi) within R&D projects about electro mobility and alternative fuels. She was also involved as project manager in several EU-funded projects about energy management. In 2017, she joined TUMCREATE as Principal Investigator of Design for Autonomous Mobility (DAM). The team investigates human-centric methods for design of Autonomous Vehicles for public transport in Singapore.
